

# PULSE OF PROGRESS IN EMERGENCY MEDICINE

The Resuscitation Science Symposium is the leading global forum for resuscitation science, critical care, and emergency cardiovascular medicine.

Programming focuses on recent advances in treating cardiopulmonary arrest and highlights bench-to-bedside and community-based research findings in resuscitation science, emergency cardiovascular care, and CPR quality improvement for adults and pediatrics.

Join multidisciplinary discussions on the latest science and practical implementation in emergency settings. Expand your network and knowledge by engaging with critical care and emergency professionals.

Visit the Resuscitation Science Symposium page to learn more.  
Registration opens Summer 2026.
