# An Experience as Unique as Your Learners
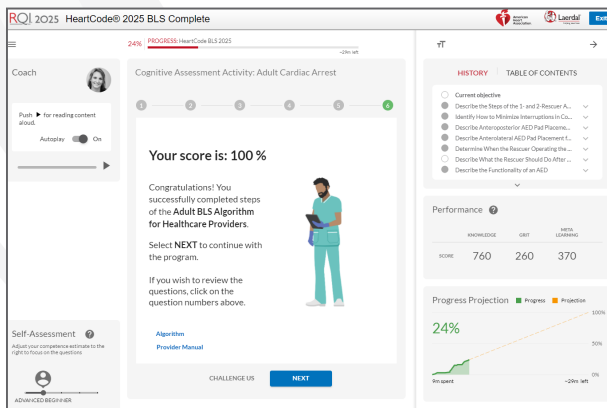

True Adaptive™ Learning

The HeartCode® and Resuscitation Quality Improvement® (RQI®) programs feature an innovative True Adaptive learning experience using a personalized algorithm that adapts in real time to the learner's specific expertise. Powered by Area9 Lyceum, a global leader in learning technology, the learning algorithm continuously adapts content as the learner is progressing through the course. Unlike conventional adaptive learning programs, True Adaptive learning continues throughout the eLearning experience.

PERSONALIZED EDUCATION

A Learning Path to Mastery

Most classroom and eLearning models follow a linear sequence – slide after slide, page after page, or a linear video. In contrast, the adaptive engine moves backwards and forwards through the learning objectives to achieve 100% proficiency in the most efficient way. Novice learners have faster knowledge acquisition and expert learners only receive content they need.

Top Benefits

- Offers reduced learning time and cost saving opportunities

- Boosts knowledge acquisition and self-awareness

- Allows for higher engagement and improved productivity

- Provides unique learning path based on learner's expertise

Adaptive spaced education boosts learning efficiency. The adaptive algorithm increased learning efficiency by 38%.

~ Kerfoot BP. Adaptive spaced education improves learning efficiency: a randomized controlled trial. J Urol. 2010 Feb;183(2):678-81. doi: 10.1016/j.juro.2009.10.005. PMID: 20022032.
