CPR Guide

Hands-Only CPR vs. CPR with breaths

**HANDS-ONLY CPR**

1. **CALL YOUR LOCAL EMERGENCY RESPONSE NUMBER**
2. **PUSH HARD AND FAST IN THE CENTER OF THE CHEST**

Public awareness campaign to get more people to act when they encounter a cardiac arrest. Starting point to get more people to learn CPR. Will not meet requirements if you need CPR for your job.

Chest compressions are good for the first few minutes someone is in cardiac arrest pushing remaining oxygen through body to keep vital organs alive. Buys time until someone with more skills can provide help.

**Who can I use it on?**

Adults and teens.

Go to [www.international.heart.org/en/handsonly](http://www.international.heart.org/en/handsonly) to learn the steps of Hands-Only CPR.

**How do I learn?**

Go to [www.international.heart.org/en/resources](http://www.international.heart.org/en/resources) to find a course near you.

**CPR Training**

CPR with breaths combines chest compressions and breaths, providing additional oxygen to circulate throughout the body.

CPR with breaths is often necessary for people who need CPR training for work.

Anyone who is in cardiac arrest, including: adults and teens, infants and children, and any victims of drowning, drug overdose, collapse due to breathing problems or prolonged cardiac arrest.
